# GLASSELL PARK ELEMENTARY S.T.E.A.M. MAGNET

Preparing Future Leaders and  
Innovators

## ABOUT US

At our school, we provide students with experiences in science, technology, engineering, art and math through integrated Project Based Learning, a teaching method in which students gain knowledge and skills by working for an extended period of time to investigate and respond to an engaging and complex question, problem, or challenge.

We lay the academic foundation for students to continue on their pathway to middle and high school and eventually to college or a career with high levels of academic, social, emotional development.

We use a multi-disciplinary approach that holistically integrates Project Based Learning (PBL) in STEAM education.

## OUR PROGRAMS

### 21st Century Skills

We provide students with the rigorous academics and comprehensive supports they need to succeed. We prepare students with 21st Century Skills, challenging them to develop a deeper understanding of subject matter, think critically, and apply learning in varying contexts.

### Link Learning Pathways

Linked Learning Pathways provide a rigorous, relevant, and college/career aligned curriculum based on four critical pillars – Rigorous Academics, Work-based Learning, Comprehensive Supports, and Career-Technical Education.

### Parent Involvement

We offer a multitude of ways for parents and community to continue to connect and engage with the school by participating in governance councils, the Partnership Action Team, the Parent and Family Center, classroom projects and activities as well as community events. Parents and community members who serve on the governance councils – SSC and ELAC, will be involved in important school decision making centered around the Single Plan for Student Achievement and including the STEAM theme implementation.
